Happy New Year!
Wednesday, January 12, 2011

Hey Everyone,

Did you receive a shiny new Apple gift? I have seen a lot of happy new Mac users through our doors in the past few weeks.

If you are looking to make a New Year's resolution this year a good choice would be to make sure you are backing up your data! I have had a lot of people talking about lost pictures over the holidays. We have ordered extra stock on many LaCie hard drives. This is a great way to make sure you won't lose any important photos or documents in 2011!

The new year is also a great time... [READ MORE](#)

Thoughts on the new App Store

For many of you, Mac Outpost is your trusted Apple Specialist and we take that trust and responsibility very seriously!

Some of you have asked us about the new Apple 'App Store' and whether you should purchase your software through the App Store instead of buying a boxed version. Here are some thoughts on the subject:

Pros for the App Store:

- There are some free and very inexpensive apps available
- Convenience - you don't have to leave your desk to get a new app

Pros for buying a boxed version:

- Peace of mind - you have your purchased software on your shelf with a disk - not just an electronic copy
- No hassle with reinstalling your software if you decide to move it to a new computer
- In stock locally - no big downloads that may take you over your ISP limit and result in unexpected charges from your ISP
- Many titles will not be available on the App Store. Current examples include MS Office and Adobe Creative Suite
- Be sure the version you are getting is the version you want! Some versions of Apps may not be as complete as version you buy on disk. Do your homework!
- And finally: support for Mac Outpost! We hesitate to be self-serving, but any business that you can bring to us helps us grow our business and be here for you for years to come!
